

## **NOTICE ABOUT COMPOSTING**

Composting is becoming increasingly wide spread. By composting, you can reduce the amount of waste directed to landfill sites and greenhouse gases produced, recover materials that have value, slow down erosion, revitalize the soil, reduce water needs, reduce pesticide needs, save money, help the garden grow and make a difference for the environment, to name just a few things.

We know that many residents have obtained or made their own composting container or bin. For us to gain an overall picture of people who do home composting, we invite residents who have not taken advantage of the municipal program to let us know, either by email (by sending their contact information and all relevant details about their composting method) at [aidetp@villelapeche.qc.ca](mailto:aidetp@villelapeche.qc.ca) or by phone at 819-456-2161, extension 2287.

We would like to remind you that the Municipality offers a composting program and bins at a reduced price. Residents wishing to obtain a bin can do so by filling out the form for this, available on the Public Works Department's Composting page, or by contacting Mr. Marcel Danis by phone at 819-456-2161, extension 2282, or by email at [egout@villelapeche.qc.ca](mailto:egout@villelapeche.qc.ca).
