

ENVIRONMENTAL PROJECT **MUNICIPALITY OF LA PÊCHE**

Organic waste makes up approximately half the volume of waste deposited in landfill sites.

In order to reduce greenhouse gases, the Government of Québec is asking municipalities to promote composting. The government has set an ambitious objective: to eliminate the burial of organic waste (yard waste, food, paper, etc.) within the next two years. Municipalities that do not conform risk losing their grants and subsidies for waste disposal, which will result in higher tax accounts.

In short, we need to act now; all the more so since recovering putrescible waste will reduce the volume of waste deposited in landfill sites, thus benefitting all taxpayers!

The Municipality of La Pêche has initiated a composting program; for \$20, you can get a 280-litre ECO composter, a 7-litre kitchen bin, a compost mixer and a starter pack of 10 paper/cellulose bags.

To sign up for this composting program, fill out the form below and bring it to the municipal office with your payment of \$20 or call us at 819 456-2161, extension 2221 or e-mail reception@villelapeche.qc.ca.

I would like to participate in the composting program

Name: _____ First name: _____

Address in full: _____
No Street/Road Postal code

Telephone No.: _____ Cell phone No.: _____
